

AskMyPolicy is a Chatbot which help us to answer the user quires where they can upload their health insurance document or any other policy document and they can ask questions If they have anything regarding the policy as its very hard to go through the document of 50+ pages our system will help to user to answer their queries very easily.

Below is the system design on how our model is build out to answer the user queries.

Below is the screenshot of one output we got from the user query

```
1 response
[ 'The sum insured amount is not mentioned in the provided insurance documents. I recommend checking the specific sections related to coverage details or policy limits in the respective policy documents for accurate information.',
  '...',
